

THE MULTIMEDIA CB!

MODEL

MIDLAND M-20

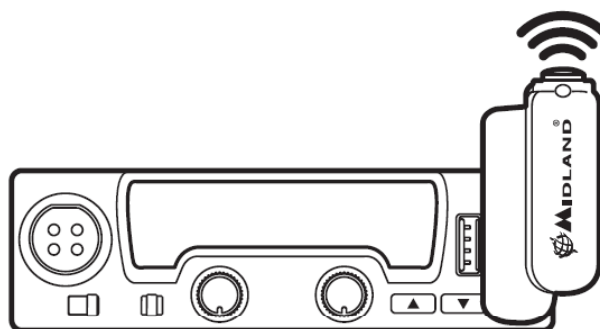

CODE

C1186

Besides M-10, M-20 is the top range model of the the Multimedia CB family. Designed with the **very latest technology**, M-20 has a **wide LCD display** with white bright backlight and a **2 pin SPK/MIC plug** to which you can connect the new wireless Midland Bluetooth accessories of the **WA line**.

With the WA-DONGLE adaptor the CB becomes Bluetooth and can be used remotely; then, to suit your needs, you can choose amongst the earphone/mikes of the WA family that make your conversations "private" and to ensure that you won't be heard all around.

Or you can plug-in a traditional headset with 2pin Midland jack, it's up to you!

CB radio with MIDLAND WA-DONGLE Bluetooth adaptor

M-20 is an elegant equipment, with a smart design and color that makes it very eye-catching.

The **USB port on the front panel** lets you recharge your electronic devices, such as smartphones or tablets, everytime you want.

M-20 is a **MULTI standard transceiver** that allows you to select many European frequency bands, according to the country where you are going to operate.

M-20 is also supplied with the **EMG control** for the the immediate selection of the **emergency channel 9**; while the **DS/SQ** knob eliminates the noisy signals in rx mode and allows to operate in Digital squelch mode.

The **ANL** and **NB (Noise Blanker)** filters can be selected through the proper button.

The **elegant microphone** is equipped with three buttons: 'UP', 'DOWN' and '**PRI**' in middle. 'PRI' gives the instant access to the **Priority channel** that can be set by the user.
